PROJECTS

Explainable Hate Speech Detection System | BERT, LIME, SHAP, React

https://github.com/A-Narain/AI_Project

Built an end-to-end explainable AI content moderation system using fine-tuned BERT, with LIME/SHAP interpretability and a Flask-React web app for real-time, ethical hate-speech classification.

Customer Segmentation using RFM Analysis | Python, Pandas, Scikit-learn

<https://github.com/A-Narain/Customer-Segmentation-Propensity>

Performed customer segmentation on a large transactional dataset using RFM analysis and K-Means clustering, with data cleaning, analysis, and visualization in Python (Pandas, NumPy, Scikit-learn, Matplotlib) to derive actionable business insights.

Smart Traffic Surveillance System

<https://github.com/M3dh4/Smart-Traffic-Surveillance-System>

A computer vision-based system that monitors traffic in real time to detect vehicles, analyze congestion, and identify violations using video feeds, enabling improved traffic management and road safety through data-driven insights.
